What is the fire wall?

It is the secondary containment wall that surrounds the 15 tanks...

Do we have the original quantity of material for each tank....

I had sent it to you yesterday... but here it is again...

Tank 1 – Yubase	56,030 bbl
Tank 2 -- Gasoline Blendstock	29,289
Tank 3 – Gasoline Blendstock	59,927
Tank 4 – Yubase	46,948
Tank 5 – Xylenes	38,330
Tank 6 – Gasoline Blendstock	48,147
Tank 7 – Pygas	42,680
Tank 8 – Naphtha	69,329
Tank 9 – Empty	
Tank 10 – Pygas	19,281
Tank 11 – SN115	61,260
Tank 12 -- Empty	
Tank 13 – Toluene	15,413
Tank 14 – Pygas	25,282
Tank 15 – Pygas	9,354

The 14 locations we specifically monitored at were the Superfund NPL sites that we were requested to monitor around, using the map / sites provided by the Dallas EOC

Steve,

Thanks, here are a couple of questions:

- What is the fire wall?
- Do we have original quantity of material for each tank?
- I would like to get a better understanding of timing of the data we are reporting. For example, are the 14 locations where we monitored last night?

Ronnie

**Intercontinental Terminals Company (ITC) Fire Morning Update
Deer Park, Texas
March 19, 2019**

- EPA continues to participate in Unified Command with TCEQ, Harris County Pollution Control Services, and ITC. It is anticipated that the fire will continue to take several days to burn out.
- As of 2:00 am, there are 8 tanks involved with the fire within the fire wall.

80-001	80-002	80-003	80-004	80-005	80-006	80-007	80-008
Flames in area	Engulfed (collapsed)	Engulfed Buckling	Manifold Fire	Flames on roof	Flames on roof	Not currently involved	Flames on top
YUBase 6	Gas. Blendstock	Gas. Blendstock	YUBase 4 Plus	Xylenes/Mixed Xylene	Gasoline Blendstock	Pygas	Naphtha

80-009	80-010	80-011	80-012	80-013	80-014	80-015
Collapsed	Not currently involved	Flames on roof	Collapsed	Not currently involved	Not currently involved	Not currently involved
Tank Empty	Pygas	SN115	Tank Empty	Toluene	Pygas	Pygas

- Both the Deer Park and La Porte ISDs will be back open at normal times this morning (03/19).
- The Trace Atmospheric Gas Analyzer (TAGA) bus departed this morning and revised its arrival time to be on site by Thursday (3/21).
- The Airborne Spectral Photometric Environmental Collection Technology (ASPECT) aircraft found no exceedances of the Texas comparison values. ASPECT conducted a screening level assessment to evaluate the unreported or undetected releases of hazardous materials or contaminants at the Intercontinental Terminals Company in Deer Park, Texas on March 18, 2019. The screening level results from ASPECT were compared to the ASPECT list of Texas Commission on Environmental Quality (TCEQ) short-term Air Monitoring Comparison Values (AMCVs) and found no exceedances of the short-term AMCVs. 1-Butene, acetone,

isoprene, and 2-Butene were detected at or below 1 ppm at several hundred meters in the atmosphere.

- Instantaneous monitoring of volatile organic compounds (VOCs) continues to be conducted by the responsible party. As of noon on 03/18, CTEH had taken 153 readings for VOCs. There are still no readings above health action levels.
- Harris County Pollution Control is conducting air monitoring to address complaints that have been received by their office.
- 2 EPA contractor teams have completed air monitoring around the 14 identified Superfund NPL sites in Harris County to determine any effects of the plume at those sites, as well as taking readings downwind from the fire in various areas. No detections were identified.
- ITC continues to take hourly water samples at the ditch feeding into Tucker Bayou and sending the samples to an outside laboratory for analysis. Initial results are expected to become available between Wednesday and Friday. There is boom deployed in the ditch to capture the foam. Traces of foam have been observed in the ditch and Tucker Bayou by the U.S. Coast Guard.

The following is the current meeting schedule at the ITC EOC:

7:30 A.M.	CTEH Air Monitoring Report Release
7:30 A.M.	EPA / TCEQ Formal Update Brief from ITC
9:00 A.M. - 9:30 A.M.	Press Release Review (30 min. time frame for approval)
10:00 A.M.	ITC Press Conference
1:00 PM.	CTEH Air Monitoring Report Release
2:00 P.M. - 2:30 P.M.	Press Release Review (30 min. time frame for approval)
3:00 P.M.	EPA Formal Update Brief
3:30 P.M.	ITC Press Conference

Informal updates are being provided to TCEQ every three hours, or as the incident evolves.

With Regards, Steve
